THE SOUTH HIS THEME. Rev. Madison C. Peters Telis New Yorkers Great Things About Us.

Rev. Madison C. Peters, who recently lectured in Stanford, delivered this eulogy of the South, as a prelude to bis sermon on returning to his church at New York: "Having recently spent a few weeks in the South, I feel it to be my duty publicly to admit that I had, until 1 enlarged my information by personal observation, an entirely erroneous idea of the South, and I take this means publicly to apologize for those uncharltable thoughts.

"My lectures were on American lines, and my pleas for Intenser Americanism and ideas, as laid down by the foundersof our republic, were met everywhere with the heartlest response. If the tocsin of war would be sounded, a foreign foe invade our shores, or an insurrectionary body arise in our midst, a million men. armed to the teeth, would come from the South and rally round the flag of the un-

"Why, the South is the only true. American part of our nation to-day, because of the immigration which is now weakening and undermining the foundations of our society. Rebel? That word must henceforth not be spoken. I belleve that the South to-day grasps the hand of the North in a fellowahlp which has in it no inlegiving nor deceit.

"The public men of the South are not, as with us, 'professional foreigners' who have made public office a public steal. The Southern men in public office are patriotic and devout, conecientionaly American and personally the embodiment of ter. integrity. But you say they do not believe ln negro domination. Neither do we North. We believe in the negroes filling the offices in the South.

Enfranchising all the negroes immediately after their emancipation, was practleally one of the greatest mistakes ever made by any free government. In ma ny counties and states the colored voters are in the majority and a majority rule would take the government.

Negro domination would mean white damnation.

The solid south is broken, and wiil break more and more if they are let alone. But let the next Congress agitate a force bill and self-defense will solldify the south again.

Interspersed with the dramatic pieces were a number of recitations delivered by the juvenile members of the echool, Fancy and Staple Groceries, including the following names: Beesle Prescott, Lillie Moore, Francis Portman, Dillie Napler, Mattie Wilkinson and Maurice Humphrey.

The scarf drill was splendidly executed by a number of beautiful young ladies dressed in white. This exercise recaived the praise of everybody.

The instrumental music between the pieces was mostly performed by the "Ca sey's Creek String Band," composed o Thomas Edwards, Thomas Wheeler and George Evans

There were also a number of beautiful pleces sung with organ accompaniment by the members of the school. They all did so well that we do not feel inclined to personate those whom we think excelled. There is good dramatic talent here. Its chief deficiency is want of drill in distinct enunciation.

THE CARE OF GLOVES.

With Good Dressers It Amounts Almost to an Art.

As the afterwear of gloves depends much on the way they are treated from the very beginning, new gloves should be put on most earefully. Those who know say that you should never put on gloves when you are in a hurry and just going out; rather choose another time, when your hands are eool and you have ten mintutes or so to devote to them. Before beginning operations dust n little powder into each glove, for this will enuse them to slip on more easily. CHRISTMAS EVE IN PARIS.

Forget and Forgive Is the Custom-Mid-

night Mass and the Family Supper. On Christmas eve in the homes of Paris, when the children are fast usleep, with the bonnes to watch over them, the older ones and the parents go to the grand high mass, lasting from 10 o'clock till midnight. This is a very solenon service and is sung with great ceremony aml with row upon row of white veiled mans, whose narrow belts of bine, orange or red show their peculiar order, kneeling in the transept.

Just at midnight the mass ends, and the altar boys smiff the tall candles.

Economizing For Christmas.

There is a touch of humor in the petty economies practiced by many men for several weeks before Christmas. The man who has been accustomed to costly lunches, and who invariably bestows a substantial tip upon the waiter, about this time of the year is likely to affect a liking for a luncheon consisting of n sandwich and a piece of pie. He does not smoke quite so many eigars as formerly and convinces himself that a less expensive weed is quite as satisfactory as his favorite brand. He does not frequent the cafes as much as formerly, and there is a noticeable lack of his usual free hearted hospitality when he encounters his friends in such places. This strange parsimony which has come over the man is not due to the fact that he has met with financial misfortune, nor that he has suddenly become sordid and mean. He is merely economizing in his expenses in order that he may have more money with which to purchaso Christmas gifts for those he loves. It may be a wife or child, mother or sisand there is no doubt that in the happifind ample compensation for it all. The signed this dish, which would hardly Christmas season is marked by iunumerbe used, however, except at the family able instances of self denial. - New York Sun.

The Yuletide Log.

In the Black mountains at the present day, the custom of bearing home the yule log is still carefully observed in all its ancient detail. The house father fells the chosen trees; then he utters a prayer and carefully lifts up his log and bears it home on his shoulder. His sons follow his example, each bearing a log for himself. The father then leans his log up against the house, being very eareful that the freshly cut end is uppermost; the lesser logs of the of one, which seemed impervious to the other members surround it, and this is heat, so he put it aside to take to Mr. the Glavni Badnjak. Lennard Jacobs, Its Discoverer, to Receive a Pension.

The Story of the Korannah's Lucky Find -A Bright Stone Picked Up by 111s Children Turns Out to Be a Valuable Dlamond.

At a time when the future of the Dark continent is, more or less, the subject of discussion in all circles, it may be of some interest to peruse a leaf torn from its past. The Cape government is eontemplating bestowing a pension ipon the founder of the diamond industry in the country over which it holds jurisdiction, and the necompanying pieture is of the fortunate individual who will doubtless be the happy reelpient.

That he is actually the discoverer of the first diamond in South Africa is a fact beyond dispute, which has been sworn to by numerous witnesses, before li. Reynolds, Esq., J. P. for Windsorton, Vaal river, South Africa.

In the year 1866, Lennard Jacobs, a Korannah, was led by a report that n German missionary, named Kallenberg, had settled in Peniel (now known as Barkly), to "trek" thither in search of religious instruction. After remaining nt Peniel for some months he became the relations, between two of its mem- dissatisfied and resolved to return to his krnal, but was dissuaded by Mr. forgiven and forgotten in this family Kallenberg, who pointed out to him the advantages of remaining within toncir of a Christian mission. lie also added hours ereep by until it is far into the to his persuasion that he had read that geologists in the old country had expressed opinion that South Africa should prove diamondiferous. It was just possible that while tilling the ground he might discover one of these valuable stones.

Jacobs, who had never before heard of a diamond, asked what it was and how it was to be distinguished; whereupon Mr. Kallenberg told him timt if he found a stone bright and shining, like glass, which withstood the fire while his pulse beat five times or more, he might conclude it was a diamond; while, on the other hand, if it popped in the ashes, it was nerystal and value-

Jacobs, rejoiced at its recovery, but still uncertain as to its value, repaired at once to the mission, where he found, much to his chagrin, that Mr. Kallenberg had been transferred to Bethany, but that his assistant, Rev. Adam Zermott, was there, to whom he showed the stone. Mr. Zermott told him he knew nothing of such matters, but that Godfrey Radloff, the storekeeper, might. He, however, would advance nothing on it, but said that he would send it to a relative of his at Colesburg, who in turn sent it to a friend lu Graliamstown, who forwarded it to Port Elizabeth, where Slr Philip Wodehouse, the governor, hearing of the stone, eaused It to be examined by an Amsterdum expert, who pronounced it a genuine diamond.

Sir Philip thereupon purchased it for £300, naming it the "Star of South Africa," and it still remains in his fau-

VIGG'S CHRISTMAS.

The snow lay shining over the moorland, and only one dwelling could be seen on all its vast expanse-a little cottage, old and gray. Travelers who passed over the moor often said, "How lonely the poor people must be who live therel'

But the cottage was a very nice one of its kind. Moss grew all over the roof, protecting it from the cold and wind. The chimney was broad and strong, and the roof, with its thatch of turf, looked In summer like green velvet covered with little red and yellow blossoms. At the end of the hoase was a tiny garden, where grew potatoes, carrots and cahbages, and by the fence were poppies and roses. Upon a bank close by stood an aspen tree, and at the cottage window hung a little curtain. The whole place was very neat and clean.

The cottage and the garden belonged to Mother Gerirnde, who lived there alone with a little boy named Vigg, whom she had adopted.

Early in the morning of the day before Christmas Mother Gertrude had started for the grocery in the village, which lay at a long distance over the moor. The san was setting, but she was not at home yet, and Vigg was very lonely in the cottage, for there was perfect silence amid the vast snow plain, which was all that he could see. All day long he had not heard the sound of a single horse's bell.

It is hard to tell how long he had been sitting there when he heard the bell of a horse dashing over the snow. He sprang to the window and looked eagerhe knew Mother Gertrude would not have any bells. The stars were lighted all over the heavens, and they twinkled and sparkled in the darkness of the night. Far away there was something very black on the snow. It came nearer and nearer, and the belis rang out londer to the cottage and stopped at the win- something pretty for me too."

His clothes were of fur from head to foot, and in one side of his month he held a pipe, while the smoke came out of the other side.

"Good evening, Pug Nose," he said. Vigg answered, with some dignity, "Good evening." "Oh, Mother Gertrude Isn't home stones,

'There are a good boy and girl here and others who must have some Christmas gifts," said Santa Claus.

Then he went into the cottage, and Vigg went with him. The family were all gathered around the Christmas tree, and the father was reading from the Blble about the child Jesus. Santa Claus slipped his presents inside the door without their seeing him and sottly went back with Vigg to the sied. Then they started again through the dark wood.

After awhile Santa Claus stopped in front of a big building, from every window of which shone a bright light. He found many presents for this house when he opened his chest, so many that Vigg wondered and marveled at them. There were bracelets, necklaces, veils and buckles and silk and velvet and gold and silver and all sorts of precious

"What are all these for?" he asked. "They are for fishes," said Santa Claus, with a wink. "For the young. ladies to catch fishes."

Now they went to the king's palace, which was much larger than even the last fine house

'Here are a couple of presents for the prince," said Santa Clans. "We will soon finish here, and then we will go to the great king in the mountain, and then home to Mother Gertrude on the heath."

Once more he opened the chest, and Vigg saw all the wonderful things he took ont.

Santa Claus and Vigg again mounted the sled, and away they went again through the dark wood.

"Now we are going to see the mountain king," said Santa Claus.

Vigg was very quiet and thoughtful for awhile. Then he asked anxiously, 'ls your chest emply now?"

"Pretty nearly," said Santa Claus as he put his pipe lu his prouth. "You have presents for all the rest. Haven't you any for me?" asked Vigg

Searcely had Santa Claus said this when he was summoned before the king lle bod a great deal to speak of, and it was nearly all good, for he worked only at Christmas time, when people are almost always kind and friendly toward each other. The dwarfs laid many, many golden weights on the scale while Santa Claus was talking, and the side with them in it grew heavier and heav-

While Santa Claus was speaking Vigg was on pins and needles, dreading to hear his own name pronounced. When at last it came, he turned first red and then pale. Yes, he was sobbing in his sleep, and the grand hall, with its crystal walls and brilliant lights, was gone, and Vigg was lying on his little bed in the cottage on the moor.

The Christmas fire was burning brightly in the stove, and by the bed stood Mother Gertrude, saying: "Poor little Viggi You had to be all alone here for a long time with no light, but I could not get home sooner. Now I have the candle for you, and such a candle as it is! And bread and ginger cake and mother cake for you to give to the sparrows tomorrow morning. And see here," added Mother Gorturde, 'here is a pair of woolen stockings which I have made for you for your Christmas present. wooden ones on Christmas day, ' Vigg had long wished to have a pair of leather shoes, and they made kim very happy. He looked at them from all sides, but he looked so much longer at the woolen stockings that Mother Gertrude thought he was looking for some and that will include an inquiry into flaw in her work. The truth was that they were exactly like those that Santa Claus had bad in his chest, and they made Vigg very thoughtful.

He threw his arms around Mother Gertrude's neck and sald:

"Thank you, Mother Gertrude, for the shoes and the stockings, many times over for the stockings."

Now Mother Gertrude placed the pot on the fire and a white cover on the table, and the candle was lighted, and Vigg put on his new shoes and the woolen stockings. Sometimes he ran to the window and looked out on the wide, snowy moor and wondered about last night how it was that he got home and when. Santa Claus had been very kind to him, and so was dear Mother Gertude, and Christmas eve was the most delightful time in all the world. - Romance.

Christmas Observance.

Properly or improperly, the observanco of Christmas is well nigh universal in Christendom, even among those that ignore the anniversaries of our Lord's death and resurrection and of the descent of the Holy Spirit. There is another curious fact, the celebration of Christmas has been oftener perverted than that of the other festivals. Varions customs of heathen orlgin were connected with It in the middle ages, and these abuses led many of the English and Scotch reformers to oppose any celebration of the day. But as a festival Beside him sat his daughter, all in the household it has now become so dear to children that we must observe lt.-Rev. M. B. Riddle, D. D.

English Christmas Customs.

In England comparatively modern enstoms are almost identical with the Roman feasts-to wit, the plight in which old Cheshire farmers used to be at Christians. At this season they were obliged to do their own work, for the servants were only engaged from Jan. to Dec. 24, which plan gave them a week's holiday. This they employed in flocking to the towns, where they spent their money in revelry. - Exchange.

DE GIERS' GREATNESS.

The Famous Russian Mulaler of Loreign Affairs and 111s Work.

No man has had more to do with shaping the pollcy of Russla in inportant matters than Nicholas Carlovitch de Giers, "the Finlander," for many years imperial minister of foreign affairs. Snave and apparently very vielding, he gained a great influence over his imperial master, the czar, and was able to guide him in all matters of a power not only in Russla, but in the world of nations. He is a diplomate be happy forever. He became chief assistant to Prince Gortschakof, minister of foreign affairs, in 1875, whose favorite niece, Princess Kantakuzene, he married. He also reorganized the whole dlplomatic service of Russia before Czar Alexander II. was assassinated. Alexander III. sent De Glers to all foreign courts to bear the famons friendly message on the programme to be adopted, and then came the great conference between Alexander III. and Emperor William I. at Dantzic, September 9, 1881, at which De Giers and Bismarck renewed the compact which had existed between the late czar and the German emperor. SIAM'S ARCHER FISH.

It Secures Its Food Supply in a Peculiar Manner.

The Unique Creature Brings Down Its Insect Prey by Shooting It with a Drop of Water-itow the Gun Is Worked.

"The sea is full of strange things," said a retired naval officer to n New York Sun reporter, "and a man in salling around the globe sees many striking novelties, but to my mind the most curious and interesting inhabitant of the salt deep is the archer fish of Siam. The feeding habits peculiar to each kind of fish seem to have developed a mouth exactly shaped and fltted for that special work, as can be seen by glancing at the mouth of any of the sucker family, which lives by drawing up food from the bottom; that of the earnivorous fish, as blues, mackerel, bass and sharks, which is wide, deep-jawed, and armed with sharp teeth to grip and hold the prey, and so with all varieties of creatures.

"This archer, or jaculator, fish haunts the eastern shore of Africa, India's seas, and the Malay archipelago, occurring in fresh water streams that open into the sea us well as in salt water. The name has been earned by its way of eapturing insect food. The method is to eject a drop of water from the long tubular mouth so forcibly as to knock bugs from the overhinging limbs of trees into the water, where they are readily devoured.

"For years travelers have told of this remarkable fish, but their stories were, until within a few years, universally discredited by the common run of people. The fish usually swim in schools mlong the shoal edges of brackish creeks or ponds, where the weeds and rushes grow out into the water. These plants are inhabited by throngs of erawling creatures-spiders, moths, ants and beetles. The archers slowly and quietly drift closer and eloser to their victims, barely moving their wide, wavy fins, until within four or five feet, when they become immovable, with eyes fixed on the living target. Then they shoot, without ever showing the mouth above the surface of the water, the drops seeming to be propelled ilirectly from the surface.

"It is not only insects on bushes and twigs that are taken in this way, for

THE ARCHER PIST.

the archers are expert wing shots as well. They will swiftly foilow a moth or fly that happens to hover close over the water until within easy range, when they will usually bring down the victim at the first shot. Some observers say that the fish exudes n drop of sticky fluid, which gums the wings of the flyer and renders them useless, but as simple water would do the same thing there seems to be no necessity for any such explanation.

"The fish are kept as pets in the gardens of wealthy Slamese, and to witness their prowess at shooting is one of the entertainments always offered to visitors. All of these parks or gardens | corder. contain pretty fountains and pools fringed by luxuriant ferns and paims. The bottoms are covered with bright, many-eolored pebbles, and as the water is crystal clear and very shallow all the motions of the fish are distinctly visible.

"At Bangkok Is the palace of the grounds surrounding it are many rare plants and trees, tame animals, and a large pond full of archers. They are favorite pets of the monarch, and he watches them by the hour. He has his nttendants carry branches full of bugs to the pool and thrust them into the soft bank on the margin. Then he and his guests sit and watch the anties of the finned marksmen and their lively competition for the dainties. In color the archer would remind one of our fresh-water striped perch, but it is darker, and the lines are brighter and more striking. The fish only grow to be four or five inches long, and are of a flat, wide shape, not unlike the saltwater pampkin seed, but with extracedinarily large, fan-like dorsal and ventral ilus, and a comparatively small, R., H. BACON, D. P. A., F. J. REED, G. P. A. Ventral lins, and a comparatively small, Louisville, Ky. Chicago, Ill. feeble tail flu. The eye is reddish and very prominent, and their sight is so Denver. keen and they are so thmid that an onlooker must be very quiet if he would not frighten them nway. They die almost instantly on being taken out of the water, and if injured in any way they soon succumb. In death their gay coloring soon fades, and they become n duil greenish gray.

"They seem to be of a social disposition, always traveling in large companies. If they have any other defeuse than their powers of flight it has not yet been learned. They may have some poisonous drop with which they can wound or kill enemies, or they may be poor eating, or, us is more likely than either, they may be too quick to be caught; but, however it is, other and larger fish give the archers a very wide berth."

WEDDING CAKE BOXES.

The Latest Styles and Materials for These Popular Souvenira.

The origin of the custom of taking home a gift of wedding cake to "dream on" is apparently without record, and yet the present fad of distributing pieces of the bride eake in dainty boxes s the outgrowth of the old-time superstition.

liowever, it is seldom "the" cake which is sent out in boxes, but that of an inferior quality, which possibly serves the purpose just as well in neath their piliows.

and sizes of these souvenir wedding eake boxes. One leading manufacturer makes wedding eake boxes in fifteen styles and a half dozen or more sizes, which are sold from \$4 to \$40 R hun-

The most popular style and those of plainly and simply made of moire paper, with a silver edge about the lid. The boxes are all hand made, with the grentest care, by women and girls, and if the slightest mar from paste or linible, after finishing, the box is east

upon special orders, and sometimes are by hand painting, by the stamping of a monogram in silver, and so on. For one wedding of recent date, the souvenir boxes were of white satin, hand painted, and cost \$180,

A novelty, really more dainty and attractive than the satin, is the Buedingen box, which is covered with fine like a easket, is either square or oblong of the erepe paper. A narrow moire

ribbon is fastened at opposite corners of the cover only, and ties in a full bow at the top, which obviates the necessity of untying the bow of ribbon every time the box is opened. The ribbons are put on almost entirely in this manner, so that the box may be preserved for a long while as a receptacle for jeweis or trinkets on the dressing table. These crepe paper boxes cost \$18 a hundred and inside have a folder of heavy paper which protects the cake from greasing through the box. An ornamental edging of lace paper adds a tusteful finish to the inside.

Another dainty box, which requires no ribbon to enhance its attractions, is the one illustrated, with n cover decorated in silver. The box is square, and In one corner is a design in bowknots, which unite "two hearts that beat as one." It is covered with watered paper and has a silver run to the cover. Many of the long and narrow boxes

have a monogram stamped in one corner, in either gold or sliver, showing the intertwined initials of the surnames of both bride and groom. The triangular box is novei, but iess popular than the others, as it is rather difficult, as well as wasteful, to ent the enke to fit in it.

All of these shapes may be varried out in crepe paper, either with or without a frill about the cover. The cateror, as a rule, attends to the matter of the souvenir boxes, which relieves the household of one of the many duties which crowd in apon one's wedding day.-Elia Starr, in N. Y. Re-

Teach children to do little things about the house. It trains them to be useful, not awkward, he later and more important affairs; it gives them occupation while they are small, and it really is an assistance to the mother in the end, aithough she always feels during the training period that it is much easler to do the thing herself than to show another how. This last excuse has done much to make seiffsh, ldie, unhandy members of an older society, and should be remembered, in its cffeets, by the mother while her little ones are beginning to learn all things, good and bad, at her knee. Occupation makes happiness, and occupation cannot be acquired too young.

Milk in the Sick Round

When a milk dict is prescribed for one who has an acid stomach, it is often hest to add a little lime water to it. Lime water is made by turning two quarts of hot water over a piece of unslacked lime an inch square. When it is slacked, stir and let stand over night. In the morning pour off as much liquid as is clear and bottle it. To haif a pint of milk add a teaspoonful of lime! water. Lime-water tablets ready for use are to be found at most pharmacies. INFERIOR MOTIVES.

A Point to He Considered in the Education of Children.

It is most important in reasoning with chlidren that only the best motives for conduct should be given them, and never inferior or wrong ones.

A conscientious chiid will often make mistakes and do the wrong thing, while he has the most slucere and unselfish desire to do the right one. Such actions in such children should not be scolded or condemned too harshiy. For it is the motive that most matters. So long as the intention be right the action may be amended, and the child learn from his error to avoid it in fu-

The difference between the motive and the action, and their interdependence are not often enough explained to children. It is more possible for a child to understand the distinction tiran people usually think. If, as might easily be done, the teacher would put the idea into simple and familiar words, most children could grasp it, and learn to be their own goldes in future, and that is what all child teaching should tend toward, or it is teaching thrown away.

Children quickly appreciate high motives. To urge your boy to do right because it is brave to do so, or because it is honorable, or because it is true, is to speak to him in a language which he can understand as well as you. And to know only such motives tends to make him the truthful, brave or honorable boy you wish him to be.

On the other hand, to habitually incite him to goodness because of the candy which comes to good boys or the punishment which awults had ones, is to create in him only the motives of greed and fear. These Incentives are not only demoralizing to the character of the child, but the force of them is weakened as the boy grows older.

Again, it is a mistake to appeal to "ontside" motives with children, such as acting for the sake of appearance or because some one is watching: "Be a good child, for uncle is looking at you;" "Don't be rude to your sister or misbehave at the table while company is here;" "liow ugly It looks for a little girl to be disobedient or unklnd!" "See how pretty it is to be amiable or generous!" "People always admire a geutle little girl." Such phrases surely do not show a child the best reasons why he should do right. Children do understand and appreciate better ones. And children have a right to the best. They have a right to as good motives as those we try to live up to ourselves .- llarper's Bazur.

"What changes have came herei" as one of my Pop friends said last evening. Forty-two years ago I came to this country and found it in the very slough of barbarism. Indians without suitable underelothing for this rigorous climate roamed up and down the St. (Poix and then it would rain some more on my No white man's life was safe. It has taken me over 40 of the best years of my life to bring about a change, but in that same valley there are now a thousand schooliouses, one nominal school in this congregational district, as my Pop friend says, and 150 churches that are almost seif supporting.

One can hardly believe that here where now we sit surrounded by all that can go to exait and embellish life, a Disuctorns should be washed out in few brief years ago the nasty Indian camped out and lived joyous and jagiess. I've seen a 300 pound man immersed in the Kinnie Kinnick, and after playing him a few moments the preacher landed him on the bank, jumped up out of the water, cracked his heels together and called for another. It was March, and ever and anon a 25 pound cake of ice would hit the parson in the back, but the rosy old apostle liked it, and we often had to go into the river and pull him out by force, he liked it so well.

Then came the vast appetite for real estate, when every one was excited, and even the preacher said one day in an absentminded way as he opened the Bible, "Brothers and sisters, today you will find my text in the N. W. 14 of the S. W. 1/4 of section 9, township 38,

Some of these little boats were like the Georgia steamer with the one horsepower engine and 12 horse whistle. I remember a little boat with a pocket engine and a calliope, and every time the calliepe played the boat stopped. Sam Jones says there are too many Christians like that. When they "hol-

A nurso and my fond wife were there, but they could not suil me out from the chaos of hed and shattered legs. All they could do was to wring their hands and put cologno on my brow.

It was one of the saddest situations I ever accepted. Finally my wife, who is a woman of quick intelligence, suggested that I could be slowly cievated by an educational process. Sho got two sets of evelopedia and some of my own literary works, and with these she managed to build up under my giant frame as I went up on one elbow at a time, so that when the doctor came I was resting, white and faint, with a work on phrenology under my head and a big octavo on lumbering in the northwest under my lumbar region.

The cyclone is a very quick movement of disturbed air in various directions and is injurious to animai life. It is, as I may say, in almost every case, acuto disturbance of nerial particles resulting from inflamed climate.

The careful student of atmospherio phenom na notices at first a small cloud about the size of a man's hand, but very soon it assumes the size and blackness of threatened tariff legislation, and before one can find the key to his cycione ceijar he is twisted so that he iooks at the fature over his shoulder savage"blades and tears of angulsh roll down over his eyebrows into his ears.

When I rose on my good leg to go to the assistance of my brother, the sharp bones of the tible and fibia cut through the lacerated flesh, and also spoiled a comparatively new pair of pantaioons. Nothing is more annoying than spectacles in a cycloue.

My brother paced the torn and disheveled road near me, almost crazed by the fear that his family had been killed during his absonce. Finally a foot passenger came by on his way to the village, and we sent for relief. I asked for a stretcher, a physician, a rubber blanket, a bottle of moxie and an even-

ing paper. The accident occurred as the whistle blew for 6 o'clock, and it was midnight when relief came. I can recall the circumstances almost without effort. A kindiy dentist pulled my leg and then set It as one would set a hen-tint is, he fenced it in with pieces of fence boards. He tied these to the shattered limb as far as the fracture and then stopped so that be prevented circulation and yet gave no protection to the agonized ieg. By morning it had swollen to its full capacity, and I shail carry down to my tear soaked grave the scars of those diagonal blisters made by the accursed bandages.

After 24 hours I saw that I would have to wear a hickory leg up the golden stair, as things looked, and so I had six good healthy pallbearers take me

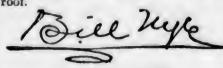

gage car, stretcher, fence boards and all, and was taken to Hudson, where there was a physician who had studied medicine. He sat my leg.

He also put it in glass. People used to come from away behind Martell to see it growing in its little conservatery. A kindly ciergyman for whom I onco lectured, in order to rebuild the belfry blown off by this same zephyr, told me that probably it was a judgment on me, for I was just learning to waltz at the time of the accident. Possibly that is true. Still I caunot believe that the Universal Father could have had it in for me on account of my crude and purely platonic waltz. I never gave myself up to the delirious pleasures of the waltz. I was kept from anything wrong by saying to myself "one, two, three," etc. So that I can truly say that if all who waltz have their heads as full of mathematics as I did they but I know a fellow who does. will die happy. FREE COINAGE OF SILVER.

The free and unlimited coinage of silver, the product of American mines, at the old ratio of 16 of silver to 1 of gold, is the only solution of and factory condition of trade, manufacture and general business of the country. The surreptitious act of 1873, divorcing silver and gold in our monetary system, was a crime of untold magnitude. It was the rankest kind of class legislation in favor of the wealthy against the producers of wealth, and hostile to the prosperity of the United States. It was an act of treason because done at the instance of a European syndicate and for bribe money, "giving aid and comfort to our country's enemies." A CHRISTMAS LEGEND.

The Miraculous Walking Stick of St. Joseph Took Hoot and Blossnmed.

There is a legend interesting in connection with the custom of extending festivities from Christmas to Twelfth day, or Epiphany. According to tradithe town of Glastonbury, rested on a hillside. His walking stick of dry haw-Jan. 6, old style. This thorn tree had two tranks and grew to an immense of it obtained general credence.

It is on record that ful tint of shrimp pink. when the change of style was made in 1763 people were greatly perplexed, wondering on what day the Glastonbury oil, taking a little turpentine also on and creating bunions and ingrowing thorn would blessom. Christmas Greens For the Churches, The most popular method for Christmas church decoration just now is to wood, which can be worked out very producing an execulent effect. The scarlet berried holly, the dark green and shining leaved ivy, green bloom pots of evergreen shrubs and the red Virginian creeper have all been utilized latterly for decorating the churches. Inscriptions by means of holly berries or in colored immortelles are also made, the latter being preferred, because some of the berries used at Christmas are poisonous, and children pick them up when they fall to the Very thin lines of delicate looking green are carried from side to side so as to intersect each other in squares, and the crossed trellis work

Brooklyn Citizen.

From the earliest times green boughs have been associated us one of the outward expressions of joy, and repeatedly in the Bible do we find allusions to them, notably in Nehemiah, where we read, "Go forth unto the mount and fetch olive branches, and pine branches, and myrtle branches," to make booths thereof, and "there was very great gladuess." Decorations may thus be claimed as decidedly Scriptural in their origin. The popular evergreens are rosemary, bay, laurel, holly and ivy, and in folklore we have many and frequent allusions to all of these. The hellebore, or Christmas rose, and the Christmas thorn, which flewers about this season, along with laurestina and arbutus, are freely used in English decorations. A very quaint poem tells of the claims of the ivy and holly for precedence. Popplar opinion places the holly inside and the tvy outside a dwelling. - Selected.

How to Tlut China and Apply the Back-

In painting flowers on china a harmonious background adds very much to the offect. For instance, white flowers, tion, St. Joseph, while passing through, with touches of pink, such as apple blossoms or azaleas, look well on a tint of rose pink matching the pink in the thorn he thrust into the earth, when it flowers. A FASCINATING FOOT.

KATE SANBORN SAYS ITS POSSESSION MAY WELL EXCITE VANITY.

In a Viauk and Everyday Way She Exhausla the Subject of Feet and Winds Up With a Quotalion from the fitble. A Word Alout Shors.

Copyright, 1894, to American Press Associa-

E OUGHT all of us to pay more attention to our used and abused feet, and as ou this theme we meet

on a common footing let me be as frank by your side.

I was impressed lately by the remarks of a promiuent public man, whose pretty daughter was sitting at his feet lacing his shoes, which were easy and sensible, but ovidently expensive. His feet had the air of being valued and cared for, and as he looked down with a pardonable bit of vanity at these well shaped, well shod pedal extremities he said: "I often talk to my feet. I say to them: You have carried me uncomplainingly many a year and many a mile. I will try to repay your faithful, luvaluable assistance by giving to you good care, comfort and cleanliness.

Then as an opposite picture there comes to mind an immense swimming pool connected with a mammoth hotel in California, where I used to sit mornlngs and watch the bathers enjoying the slide and diving, floating and general sport. And such pathological specimens of feet. Oh, horrors! A distressing collection of distorted misshaped terminations that had once been pretty, dluipled, pink toed, symmetrical feet! Knobs, excrescences, toes twisted and cramped and a corn on each, hardly a decent foot even among the women. A few young girls had not succeeded in spoiling theirs, but they were doing their best to attain that result. Artists find it almost impossible to secure even a natural foot as a model.

"Trilby" feet are rare, out of novels! A dainty, well kept, fascinating foot is captivating, and who can blame a wonran for being vain of such a possession?

But if nature, nided by the laws of forbear to deform such feet as have been Deep blue green and apple green in vouchsafed to us. Girls are far more seusible now about footgear than in satin slippers, with no sort of extra protection, even in going through snow to reach her carriage. My generation were inclined to wear boots and shoes a size the effect, whereas it but increased the breadth, making the tortured foot look nails. I know well that I labored to squeeze a 41/2 foot into a 3 boot because and demigod, as girls will, once said posed that when I wanted to enter a door "I had to take them off, nuserewing them, and begin endways!" He was said this in the merest fun. But how my poor punished toes did ache and rebel and pay me back in full for my id-

Nowadays girls and women understand that a half size in extra length gives a stylish effect and adds to comfort. I offered a pair of pretty slippers, made for evening wear, with the fashionable French heel, to a schoolgirl whose foot was smaller than mine. But she said most sensibly: "Oh, I could not wear thosel My teacher at the gymnasium insists on my wearing a 5 always!" The craze for physical culture and athleties is a boun to the so long oppressed feet. Look at the shoes made for running or for long tramps or climbing mountains! I think the excessively broad sole is not a good innovation. Our feet are not shaped like a dustpan or a palm leaf fau, and the poor little toe, scraping along all alone, in unaccustomed space, is apt to make complaint. Wo care much more for the exterior covering than for what is protected. Patent leather is showy, "dressy," as they say, but is sure to draw the feet and will soon crack and look shabby. How well I remember the agony and mortification of a distinguished elecutionist who once dined with me, having the seat of houor. I saw he was suffering, but thought it courteous at first not to notice it. But he grew pale, and evidently something tried to get off his brand new patent leather shoes. His feet were so swelled he had to call for assistance, and then he plunged the feet into cold water and had them rubbed, and at last in an old pair of slippers, a mile too big for him, he returned too late to enjoy a good dinner. He endured like a Spartan, but relief had to be obtained. He felt that etignette demanded his remaining at his post. Old shoes (bless 'em!) must always be worn when one has to stand long or in traveling or whenever such an experience would be avoided. The feet should be bathed every night in warm, not hot water, made soft with a little borax, soda, pearline or ammonia, and then rubbed with pumice stone on vito heel to keep it smooth, occasionally giv-

Remove the thorn from the mon obstinate sort (after moistening winn driuted ammonial with a sleep pen unlife or an old razer. Use icame for untlamed, swelling joints. A hand of old fashioned sticking plaster wound round the entire foot is often a great comfort. Use powder in summ.er. Change stockings often. After all tals comes warmth. Disease often strikes a fatal chill through thin soles or improtected ankles. Worm feet le winter are the secret of tradom from colds. A pair of la cent cork soles will often ward off pneumonia. Running about the room with bare feet chilly morndeath many a time to my knowledge It may be all right for that wise menk somewhere in Germany to oblige his patients to dash barefooted through the snow. He puts them through proper treatment after the shock. We must not attempt it.

Then walking-this seems a simple thing, but how many people do you know who walk well, so that it is a pleasure to watch them? The majority reveal laughable, lameutable ignorance of the Most persons show almost the entire soles of their feet as they approach you. Some strut along on their heels. Some toe in with one or both feet. The ball of the foot should first touch the ground or floor. At tenst we should aim for that and keep the sole down, springing a little on the too. How many people over 35 can you think of who move easily or have any elasticity as they move? Tapping the floor with the feet nervously, as always seen on the stage, is forbidden by every disciple of Deisarte. It is a natural but inelegant way of expressing impatience, auxiety or indecision. No one has learned the great art of self control who cannot keep his feet still under trying circumstances. Then the position of the feet ln public places. Look at the long row of feet in a ferryboat, too absurdly many to try to describe. Many unconsciously wind one foot round the chair leg while eating. Some even sit on one foot.

Notice all this to learn better manners for yourself, but den't allude in a personal way to ill bred positions of feet in a public place, or you may get caught as I did. I had been listening to an interesting essay on grace in ordinary life, in sitting, standing, walking, etc., und after it was fluished a gentleman asked to be presented to me whom I had long wished to meet. He complimented the speaker, owned the truth of the criticisms, and as I happened to see a young lady in front of us, with right foot inlook ahead of us at a striking instance of such bad habits." He looked. His is my daughter." Conversation naturally flagged, and he soon excused himself. I had unwittingly "put my foot into it." Pity me.

Last of all, but most important, don't make your feet carry you where you ought not to go, where you would be ashamed to be seen by those you best love. The Bible is considered old fashioned and mostly historical these advanced days, but it is full of warning advice on this as on almost every other subject enacted to our well doing. I give but one line from Proverbs, "Pouder the path of thy feet!"

KATE SANBORN.

TRUE AND FALSE EDUCATION.

Book Learning Is Often a Superficial Advantage-A Common Error. All men and women who by native

justice of mind or acquired freedom from prejudice have been able to consider the matter in the abstract must have become convinced that the tendency to judge a person merely by his celleeted treasures of book learning is an erroneous one, and that the idea of connecting the term "education" solely tion in its best sense means not the eramming in of a knowledge of accomplishe ed facts, but a drawing out and developing of natural powers. A woman may be an excellent Greek scholar. She may be informed as to the successive events of history and science; sho may have had as thorough an edacation in the technical sense of the word as she is capuble of receiving, yet she may be as narrow minded, as faulty in her mode of thought and as lacking in wisdom as if she did not know the alphabet. In fact, in the broader sense, she has absolutely no e lucation, because other persons' thoughts have been forced into her head instead of her own ideas being recognized and enconraged to develop, Strength and decision of character, quick reasoning powers and keen observation are as desirable results of a course of training as a knowledge of ancient history and the differential calenlus. One of the commonest of errors, especially among women, is that of assuming that education consists in the heaping up of pieces of information, and that a person who has not an unfailing supply of facts at his tongue's end is stupid, unrefined and inferior. Mere scholarship, although an advantage, is a superficial one. Unaided it cannot make a narrow mind broad nor an undecided character decided. To institute it as the standard by which to judge the depth and mental power of one's friends is to make a mistake for which a lifetime can sometimes not atone.
